Patient care is the cornerstone of our company. Most of our RRTs work out of a clinic-based environment, seeing patients in a professional and caring setting.

RRTs at IRS are involved in all aspects of respiratory home care; from the testing and treatment of sleep apnea and delivery of home oxygen therapy, asthma/COPD clinics, spirometry and inservices to educational seminars for doctors and paramedical professionals.

IRS offers a unique environment where creativity, dedication and enthusiasm allow RRTs a direct say in the direction the company takes.

Pick your preferred location and we will work with you to ensure you and your family make the transition as easily as possible. With so many wonderful locations throughout British Columbia, you should have no trouble finding the perfect location.
